

HARSH DUBEY

Full Stack Developer • MERN Stack • React.js • Node.js • Python
hd84339@gmail.com • Mumbai, Maharashtra, India • [linkedin.com/in/harsh-dubey-498498256](https://www.linkedin.com/in/harsh-dubey-498498256) • [Portfolio](#)

PROFESSIONAL SUMMARY

Motivated Full Stack Developer with hands-on experience building scalable, production-ready web applications using the MERN stack. Skilled in designing responsive UIs with React.js, developing robust RESTful APIs with Node.js and Express, and implementing real-time features with Socket.io. Currently contributing as a Full Stack Developer at Webvision Softech, with a strong track record across marketplace, logistics simulation, and e-commerce projects. Top 10% Next.js performer with a passion for clean code, system design, and impactful user experiences.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Context API, Bootstrap, Tailwind CSS, Responsive UI/UX

Backend: Node.js, Express.js, Django, FastAPI, RESTful API Design, JWT Authentication, Socket.io

Databases: MongoDB, PostgreSQL, Mongoose ODM

Tools & Platforms: Git, GitHub, Postman, Vercel, Netlify, Heroku, Google Maps API, Geolocation APIs

Other: Role-Based Access Control, MVC Architecture, Real-Time Systems, Agile Development

EXPERIENCE

Full Stack Developer — Webvision Softech Pvt. Ltd.

Dec 2025 – Present | Vasai, Maharashtra

- Developing and maintaining full-stack web applications using React.js on the frontend and Node.js/Express on the backend, contributing to production deployments
- Building and consuming RESTful APIs for client-facing products, ensuring data integrity, security with JWT, and optimized response performance
- Collaborating on responsive UI implementation and backend logic for multiple client projects across e-commerce and service domains
- Utilizing Git-based workflows for version control, code reviews, and agile sprint-based feature delivery

PROJECTS

Passly — Local Marketplace & Shop Discovery Platform | *React.js, Node.js, Express, MongoDB, Socket.io, Google Maps API, JWT*

- Developed a location-based marketplace system enabling users to discover nearby shops and products using Google Maps API with real-time geolocation filtering
- Built a JWT-based authentication system with multi-role access control (User / Shopkeeper / Admin) including protected routes and session management
- Implemented real-time bidirectional chat between buyers and shop owners using Socket.io, enabling instant product queries and order communication
- Designed scalable REST APIs for users, shops, products, cart, and orders following MVC architecture with modular, maintainable route handling
- Delivered a responsive mobile-first UI with dynamic state updates for product listing, cart management, and order tracking

HOS / ELD Compliance Simulator — Driving Hours & Route System | *Python, Django, FastAPI, PostgreSQL, REST APIs, Geolocation Logic*

- Designed a backend rules engine to track and validate driver hours — driving, rest, and on-duty time — in accordance with real-world HOS (Hours of Service) federal regulations
- Built RESTful APIs to validate driver compliance in real-time scenarios with automated rule enforcement and structured error reporting
- Implemented route-based calculation logic for time and distance constraints, simulating logistics dispatch workflows across multi-segment trips
- Created a structured trip logging and report generation system with modular engine design enabling scalable rule updates and compliance audits

Variety Megamart — Full Stack E-Commerce Platform | *React.js, Node.js, Express, MongoDB, Redux, Context API, REST APIs*

- Built a full-stack e-commerce platform featuring product browsing, advanced filtering, and search across a dynamic, database-driven product catalog
- Implemented cart and checkout flow with Redux-powered global state management ensuring consistent UX across routes and browser sessions

- Developed an admin dashboard for real-time inventory and order management including product CRUD, order status updates, and analytics views
- Designed RESTful APIs for product, user, and order entities with authentication middleware and role-protected admin endpoints
- Optimized frontend for responsive performance across desktop and mobile, leveraging lazy loading and efficient component re-rendering

EDUCATION

Bachelor of Science — Mathematics and Computing

2023 – 2026

VIVA Institute of Technology, Mumbai, Maharashtra

CERTIFICATIONS & ACHIEVEMENTS

- Top 10% Next.js Coder — Verified Performance Certification
- Certificate of Completion — Full Stack Web Development
- Deployed 3+ production-grade full-stack projects spanning marketplace, logistics compliance, and e-commerce domains
